

Dear Colleagues,

"**Low-altitude economy (LAE)**" was recently adopted as a local strategy for new industrialization following **CE's policy address**. In HKU, a group of colleagues from engineering, science, business and law faculties are gathering to push for this exciting new direction. On 11 November the GBA Low-Altitude Economy Alliance (LAEA) signed its first MoU with HKU to promote LAE. We now aim to launch the first MSc in Engineering in Low-Altitude Technology in 2025 and research projects in all areas relevant to LAE are being formulated. As the most comprehensive university, we aim to **form a unique research institute for LAE** to lead in important directions in Hong Kong and to collaborate with our sister institutions. To discuss the way forward, we would like to hold a roundtable forum:

Date : 3 December 2024 (Tuesday)

Time : 10am-12pm

Venue : CPD 3.28

All are cordially invited to join the session. To help build the collaboration network, please register below.
